

About Me

As a Senior Data Quality Manager with experience of 9+years in the industry, I specialize in making sure your data is accurate and reliable. With my expertise in data governance and quality assurance, I can design processes to improve your data and lead teams to achieve your business goals. Let me help you make informed decisions with confidence.

- Proven experience in data governance and quality assurance
- Skilled in designing and implementing data quality processes
- Strong leadership in cross-functional teams
- Expertise in data profiling, validation, cleansing, and standardization
